Did You Know?

Ten Fun Facts About Penguins

1. A group of penguins in the water is called a raft but on land they're called a waddle! .
2. Penguins come in all sizes and can range in weight from 2lbs all the way up to 80lbs.
3. Although penguins are birds, they have flippers instead of wings.
4. The black and white "tuxedo" look that most penguins have is a clever camouflage called countershading.
5. Most penguins have a diet that consists mainly of krill and squid.
6. Just like humans have their own unique voice, penguins have their own calls.
7. Penguins huddle together to protect themselves from predators. When it's really cold, huddling helps penguins stay warm.
8. Penguin feet are adapted to walk long distances. Some penguins can march up to about 60 miles across sea ice to get to their breeding grounds.
9. Many male penguins gift female penguins with rocks in order to woo them.
10. Penguins don't have teeth. There are serrated ridges on the top of their mouth that can be used to break up food.

Now It's Your Turn!
