

Saplings Colouring Package #41

Did You Know?

Ten Fun Facts About Wolves

1. Wolves live in families called packs. A wolf pack usually has 6 to 10 members, which are mostly mom, dad, and their puppy offspring.
2. Wolves have two layers of fur. The top layer keeps out snow and water, while the fluffy inner layer traps air to keep them warm in freezing weather.
3. Wolf pups are born with blue eyes. As they grow to be about 1 to 2 months old, their eyes turn a bright yellow, gold, or brown.
4. A wolf's sense of smell is about 100 times stronger than a human's, letting them sniff out other animals from 1.6km away.
5. When sprinting, wolves can reach speeds of more than 60km per hour.
6. Wolves don't howl at the moon. They actually howl to talk to other pack members or warn rival packs to stay away from their territory.
7. Once a male and female wolf find each other, they usually stay partners for the rest of their lives.
8. While mom and dad hunt, other adult wolves in the pack help watch, protect, and feed the babies.
9. A hungry wolf can eat up to 20 pounds of meat in a single sitting, though they can also go a whole week without eating if food is hard to find.
10. Wolves love to play: Just like your pet dog at home, young wolves love to play tag, wrestle, and pounce on each other for fun.
